1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In page 7, line 3, of the specification, i.e., the substitute specification accompanying applicant's response, *both* occurrences of the term "chloride" have been changed to -- chlorite -- in order to correct an obvious error (e.g., note the corresponding chemical reactions (1) and (2) in page 7 provide the formula for sodium chlorite, not chloride).

In claim 1, line 17 (or line 2 of step d.), the term "entered" has been changed to -- enter -- in order to correct an obvious grammatical error.

2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-12 is that none of the references cited, taken either singly or in combination, teach or disclose a method preparing chlorine dioxide in a well, as in the claimed combinations, including the step d. of claim 1 calling for the use of the respective lines, tanks and high pressure pumps for injecting the reactants/components into the well, wherein the chlorine dioxide block-removing agent is generated. For example, Teeters (5,084,210) and Sacco (4,945,992) discloses the use of the respective tanks, feed lines and high pressure pumps associated with a well for handling the chlorine dioxide reactant components, however, the chlorine dioxide is generated in an above-ground reactor, rather than in the well. Zaid et al (6,431,279) does disclose the generation of a chlorine dioxide well treatment fluid

within the well and/or formation(s), but includes a specific procedure for emplacing the reactants in the well, which appears to exclude the use of tanks, lines and high pressure pumps for the respective reactants, or any above-ground mixing of such reactants/components prior to injection into the well.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
